

## Practice Test Questions for Remote Sensing 38/42:353

Complete the figure below.

A similar test question:

On the a colour infrared photo you observe a plume of silty water entering an otherwise deep/clear water body. The deep clear water appears nearly black, however, the silty water is reflecting higher in the visible portions of the EMS. What colour will the silty water appear on the photo and why? (2 pts)

What's going on at each step in the figure below?
